The effect of a horse's rhythmic walk offers benefits that are not obtainable through traditional therapies. As the motion of the horse transfers to the rider, spastic muscles relax, muscles not ordinarily used are awakened, and the rider experiences a new kind of freedom of motion. For someone who cannot walk, see, communicate, or accomplish basic tasks without extreme difficulty, therapeutic riding is a powerful and liberating experience. Rodeo occupies a unique position in modern sports, having developed from an American culture that is rapidly changing. Rodeo is a window into the past, while at the same time, a unique and fully modern sport with an exciting and interesting atmosphere.

Put a smile "a mile wide" on your special needs kids and give them the opportunity to ride and have their picture taken on horseback. **All riders are supervised and helmets are provided, or you can bring your own helmet if you have one.**
